

ClickSpeed

Disposable mop for ClickSpeed mopping system

Application area

ClickSpeed disposable mops are suitable for use as part of the ClickSpeed mopping system for all hard floors in eg. hospitals, elderly people homes, administration buildings, schools, hotel halls, restrooms. They can be used on resilient floors, on wooden floors and on ceramic tiles. For wooden floors wet use is not recommended. On all water resistant floors, ClickSpeed disposable mops can be used moist or wet.

Product description

The ClickSpeed mopping system combines the strength of a mopping system with the flexibility of a floorcloth system. The nonwoven disposable mop contains microfibre and carries the patented novolon structure to pick up loose dirt.

Customer benefits

Hygiene. The ClickSpeed disposable mops are colour coded to avoid cross contamination. After use, the contaminated mops are thrown away.
Ergonomics. Good gliding means less stress on body and arms.
Cost savings. No high investment in mops required. ClickSpeed disposable mops cost as much as the wash cost for a durable mop in an external laundry.

Instructions for use

1. Put 30 folded mops in a mop box (always fold 10 pcs at once)
2. Put a sieve on the mop box
3. Pour cleaning solution on the sieve (50 ml for each mop)
4. Take away the sieve and wait some minutes to let the mops soak the liquid
5. Take one mop out of the box and throw it on the floor
6. Insert the ClickSpeed frame and close the clamp
7. Turn the mop around under the ClickSpeed frame and start cleaning the floor in S-shape movements
8. Dispose of the mop in a waste bag by opening the clamp on the frame
