

Tork Universal Wiper 310 Bobina Secamanos

artículo: 120155

sistema: M2 - sistemas de alimentación central de gran tamaño

Capas: 1

Color: Blanco

Impresión:

Relieve:

Anchura del rollo: 20 cm

Longitud del rollo: 300 m

Diámetro del rollo: 18.7 cm

propiedades del producto

- Producto de limpieza polivalente apto para diversos entornos de trabajo.
- Ideal para zonas de alto consumo.
- La dispensación central hace que el cambio de rollo resulte rápido y fácil.

datos de envío

artículo para consumidor:

EAN: 7310791229720

artículos: 1

altura: 200 mm

anchura: 187 mm

longitud: 187 mm

volumen: 7.0 dm3

peso neto: 1470 g

peso bruto: 1470 g

artículo para transporte:

EAN: 7310791229737

artículos: 6

artículos para consumidor: 6

material: Plastic

altura: 200 mm

anchura: 374 mm

longitud: 561 mm

volumen: 42.0 dm3

peso neto: 8.82 kg

peso bruto: 8.93 kg

Content

Recycled fibres, Chemicals

Material

Recycled fibresRecovered paper can be produced both from collected newsprint, magazines and office waste. The paper is washed with water and treated with chemicals under high temperature and then filtered. Different fibres demand different processes and this determines the end product properties, and makes the fibre type (recovered or virgin) less important. The environmental

benefits and economic feasibility of recovered paper as a raw material source depend on its availability, transport distance and the quality of the collected material. Bleaching of fibres Bleaching is a cleaning process of the fibres and the aim is to achieve a bright pulp, but also to get a certain purity of the fibre in order to achieve the demands for hygiene products and in some cases to meet the requirements for food safety. There are different methods used today for bleaching ECF (elementary chlorine free) where chlorine dioxide is used, and TCF (totally chlorine free) where ozone, oxygen and hydrogen peroxide is used.

Chemicals

The chemicals used in the process as well as the functional chemicals are assessed from an environmental, occupational health and safety and product safety point of view. The used functional chemicals are: Wet strength agent Dry strength agent Dye Fixing agents Fluorescent whitening agent Glue Softeners The process chemicals are: Antipitch Protection agent Yankee coating Defoamer Dispersing agents and surfactants pH and charge control Retention aids Broke treatment chemicals Drainage aid

Packaging

Fulfilment of Packaging and Packaging Waste Directive (94/62/EC): Yes Environmental label = Ecolabel This product does not have an ecolabel.

Date of issue 10-02-25

Revision date

Production

This product is produced in Kostheim mill, DE, certified according to ISO 9001, ISO 14001 and EMAS.

Destruction

This product is mainly used for personal hygiene and can be collected together with household waste. If used for industrial processes check local regulations for destruction.
